

Earning FSC® Certification

American Printing Company is proud to be among the first “certified green” printers in the Southeast. Among the credentials needed to earn Forest Stewardship Council® designation, we’ve confirmed that we practice, as follows:

Sort and recycle 95% of our production waste.

Encourage our clients to consider recycled papers. If not possible, recommend papers from sustainable sources.

Use only vegetable-based inks that are non-toxic and have negligible Volatile Organic Compounds.

Ensure that every step of the printing process is producing the lowest possible waste, including equipment.

Continually seek ways to do our part in protecting the environment.
